

## **REPORT ON INAUGURATION CEREMONY OF SCIENCE CLUB**

The science club inauguration event was organized by the club members at Soundarya composite PU College on 20<sup>th</sup> July 2023 at 11.30 am in the main campus hall. The event aimed to officially launch the science club and gather students and faculty members who show a passion for science fostering a vibrant community of science enthusiasts within the college.

The event commenced with welcoming remarks from the science club's event anchors which were followed by prayer and lighting lamp. The President of science club introduced the aim and purpose of the club along with an overview of the planned activities and initiatives for the academic year 2023-2024 and shared glimpses of the past activities of the club.

Dr K R Prabhu, the Journal of Organic chemistry shared his remarks on the event. At present his research work is focused on the various aspects of organic synthesis with the major emphasis on the development of new methodologies and their applications in organic synthesis.

He delivered an inspiring keynote speech. He also emphasized the significance of promoting scientific curiosity among students and congratulated them on taking the initiative to form science club.

The inauguration event provided a platform for students interested in science to connect with the likeminded individuals. The event concluded with closing remarks from the Principal Capt Mahabaleshwara Tunga, who expressed gratitude to all the attendees and encouraged them to actively participate in the upcoming science club activities.

The event's success was a testament to the dedication and hard work put forth by the science club organizing committee and strong backing from the college administration. As the science club moves forward, it is expected to inspire a new generation of scientist nurtured by the spirit of curiosity and the pursuit of knowledge.
