

## Industrial Visit to AB Industries

Industrial visits offer students the opportunity to see the theories they learn in the classroom being applied in real-life settings. Understanding industry operations: Industry visits can help students understand the functioning of an industry and how different departments work together to achieve common goals. In view of above aspects, we at Soundarya Composite PU College provide our students with regular visits to training centres and industries, today our students had a wonderful opportunity of visiting AB Industries at Sommashettihalli, our institution being at the industrial hub provides regular visits to small scale industries.
