

Industrial Visit to Amwin Machining (P) Ltd., Peenya

Commerce students of Soundarya Composite PU College recently visited Amwin Machining (P) Ltd., located in Peenya – one of Bangalore's prominent industrial hubs. This visit provided students with hands-on exposure to modern machining processes, industrial operations, and quality control techniques.

Guided by industry experts, the students gained practical insights into manufacturing procedures and business operations, bridging the gap between theoretical concepts and real-world applications. The experience not only enhanced their understanding of commerce-related industries but also inspired them to explore potential career opportunities in the manufacturing sector.
